

Event Types & Flows Questions

Job Fair Flow

Company Perspective

Q1. How does a company get invited to the Job Fair?

A: The admin sends an invitation email to companies containing a link to the Job Fair application form.

Q2. What happens when a company fills the Job Fair form?

A: The company provides details such as company name, email, location, description, and representative info.

Then the admin reviews and either **accepts or discards** the request.

We may add status tracking (Applied , Under Review , Approved/Rejected”).

Companies may need the ability to reapply or update applications

Q3. What happens after the company is accepted?

A: The company receives an acceptance email and gains access to the Job Fair portal.

Q4. What data can the company edit in the system?

A:

Some data requires admin review and approval (→ *pending*). •

Other data can be edited instantly and saved directly. •

We should define which fields are “required” and which are “operational” •

Q5. How does a company define job openings?

A: The company fills in its **job profiles** and specifies the **number of positions** for each.

Q6. What types of interviews can a company choose?

A: The company can select **HR**, **Technical**, or **Both** interview types.

Q7. How are interview queues handled?

A: The company decides how many queues to have ($\leq$ number of positions) and whether each position has its own queue.

The company should specify max concurrent interviews

Q8. Can a company request a branding day?

A: Yes. The company can indicate if it wants a branding day and provide speaker data for it.

We need to define branding day Details (duration, speaker session slot).

Could be a **separate event subtype** inside Job Fair.

Q9. What happens after the company submits its data?

A: The admin reviews and either **accepts** or **discards** the company's setup.

Q10. How are queues generated?

A: Queues for each position are **automatically created** based on student attendance.

Q11. Can the company access student CVs?

A: Yes. Companies can view all uploaded CVs on the platform.

Access need to be adjusted manually not automatically

Q12. How does shortlisting work?

A: Companies review CVs and create a **shortlist** of students for interviews.

Q13. Are queues ordered or random?

A: The queue order is **randomized** for fairness.

randomization within track.

Q14. How does the company manage interviewers?

A: The company fills in **interviewer details** for each queue.

Q15. Can a company reschedule interviews?

A: Yes, a company can request a **reschedule**, which the admin may approve.

Q16. What happens during the interview?

A: The company starts the interview, views the student's CV, and marks it as completed → moves to **Next**.

Q17. Can companies skip or replace students during interviews?

A: Yes, they can **skip students** or **add new ones** during the interview process.

companies can't add specified students.

"Reschedule" should require admin approval with auto-notification.

Q18. Can companies mark break times?

A: Yes, companies can indicate **break times** in their schedule.

break slots shouldn't overlap with interview queues.

Q19. Are companies required to give feedback?

A: Yes, companies must fill a **feedback form** about the Job Fair event.

Feedback should be mandatory before closing the event tab.

Q1. How can a student prepare their profile?

A: Students can upload **multiple CVs** under their profile.

Add Limitation to cv number and size.

Q2. Can all students join every Job Fair?

A: No. Visibility is restricted based on **tracks or programs** approved by the admin.

Q3. What can students view before the fair?

A: Students can browse **company details**, job profiles, and branding info.

Q4. How do companies access student CVs?

A: All approved student CVs are visible to companies for screening and shortlisting.

Access need to be adjusted manually not automatically

Q5. What happens on the day of the Job Fair?

A: Students **check in** to confirm attendance. Once checked in, they are **added automatically** to the queues for their scheduled interviews.

Q6. What if a student's turn comes while they're in another interview?

A: Their turn is **paused**, and they **don't lose** their position.

Q7. What if a student misses their turn without being in another interview?

A: They are either **moved to the end** of the queue or **temporarily halted** in their position.

We can make time for "missed turn." (e.g., 3 mins before push to end).

Q8. Do students fill feedback after the event?

A: Yes, students submit a **feedback form** about the Job Fair (optional).

The form should be dynamic

Q9. How is final acceptance handled?

A: After interviews, both the **company and the student** fill a form confirming

whether the student was accepted.

Admin Perspective

Q1. How does an admin create a Job Fair?

A: The admin creates the Job Fair event as a **draft** in the system.

Q2. How are companies invited?

A: The admin sends **invitation emails** to companies with the event link.

Q3. What happens after companies apply?

A: Admin reviews company submissions and **approves or rejects** them.

Q4. How are job profiles managed?

A: Admin reviews job profiles and **confirms** them before publishing.

Q5. When is the event published?

A: After confirmation, the admin **publishes** the event and **announces shortlists** to students.

Q6. How does the admin manage venues?

A: Admin assigns **labs or halls** for each company.

requires integration with ITI's physical Locations

Should also support *drag-and-drop calendar view* for scheduling.

Q7. How is the agenda managed?

A: The admin creates a **detailed agenda** for the Job Fair and a **separate agenda** for the Branding Day.

Q8. Can the admin reschedule?

A: Yes, the admin can **reschedule** any company's appointment or queue.

Q9. What queue data can the admin view?

ITInfo@iti.gov.eg

+202-35355656

ITI-Information Technology Institute

www.iti.gov.eg

A: The admin can monitor **real-time queue stats**, such as the number of interviews per company, ongoing sessions, and attendance.

Add filtering by track, company, or time slot.

Also, enable export/reports.

Internal Events

Admin Perspective

Q1. How does an admin create an internal event?

A: Admin creates a new event, defines its agenda, and adds **speaker details**.

Q2. How does the admin collect feedback?

A: Admin creates a **dynamic feedback form** that can be customized per event.

Q3. Can the feedback form be shared with speakers?

A: Yes, the feedback form can be **shared directly** with event speakers.

Student Perspective

Q1. How do students access internal events?

A: Students can **browse all internal events** through the portal.

Q2. Can students join or register for events?

A: Yes, students can **join** events of interest.

Q3. How do students mark attendance?

A: Students **check in** when they attend the event.

Q4. Is there Q&A during the event?

A: Yes, a **Q&A link/tool** will be provided during the event.

Q5. What happens after the event?

ITInfo@iti.gov.eg

+202-35355656

ITI-Information Technology Institute

www.iti.gov.eg

A: After it ends, students can fill in the **feedback form** provided by the admin.

External Hosted ITI Events

Admin Perspective

Q1. How does ITI handle external events hosted by others?

A: The **coordinator** of the external event fills out a form to register the event.

Q2. What details are required from the coordinator?

A: The form includes personal data, **faculty**, and **university** — preferably using dropdown selections for standardized input.
